Marangoni STG Dryers

www.WetBenchUSA.com

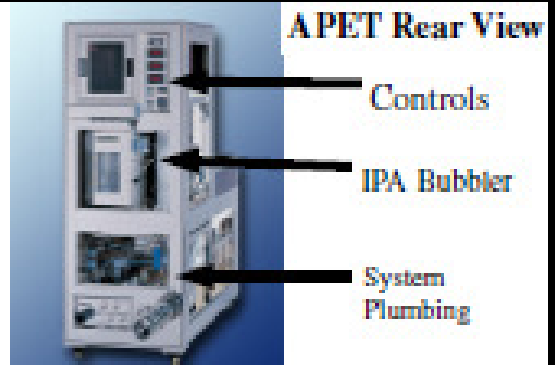

- Integrated or Stand Alone Dryers
- Watermark free SGT drying technology
- 500 Systems in the Field
- Patented CrossFlow technology assures ultra clean IPA meniscus
- Texas base equipment and PE support
- Excellent user references

STG Dryers available in Cassette configuration or Cassetteless

Apet's unique patented bath design incorporates (OWF) one way flow to assure the IPA meniscus is quickly cleared of any debris. Our particle removal results are second to none.

Please visit us on line for detailed product information and for videos of our systems and technologies

Our patented dome technology coupled with a series of IPA injectors achieves clean watermark free results. Shown here, the pink indicates uniform flow within the dome. Typical Marangoni chambers have square loadlocks with dead space and poor flow uniformity issues.
